SG12

Quality comfort pride!

Dual Stage Pivot System.

1 This revolutionary system is patented and exclusive to Gaerne. The first pivot is attached to the "Razorback".
2 The second pivot is fixed on a sliding glide that allows the rider's foot to feel

natural while on the peg in a shifting or breaking situation - However, it will "bottom out" and absorb shock in the case of over-jumping a jump or in the case of unwanted compression.

3 This provides a rigid component that offers a strong lateral support while a glide-plate keeps the upper in a firm and upright position.

Front Plate/Shin Guard.

The Thermoplastic shin plate is anatomically shaped for a perfect fit. By removing three screws you can also make the opening wider to accommodate a bigger leg or knee-brace.

Dual Composite Sole.

Anti-shock rubber that has made Gaerne soles famous around the world.
